

Level of SIEF activity

DORMANT

This could include companies that have only pre-registered to secure your current business, without the intention for later full REACH registration.

PASSIVE

Who plan to register, but have limited human resources or interest to actively participate in the discussions. Your main interest is participating in the final part of the joint-registration, not participation in the preparation of the technical dossiers.

INVOLVED

This will include companies who want to have some input into the technical dossier creation process, and to register.

VERY ACTIVE

This will include companies for whom the substance is of strategic value to their business, and who can make human resources available to actively participate in the technical meetings and SIEF activities.

Have no obligations
to register

They have to
register and pay for
their REACH dossier
